

LSA OIL STABILIZER

LSA OIL STABILIZER has been developed using advanced additive technology to provide a protective coating to metal surfaces in engines, differentials, gear boxes, transmissions, hydraulic systems and other equipment.

It reduces metal to metal contact and wear when added to mineral and synthetic oils and greases.

LSA OIL STABILIZER boosts oil and vehicle performance in new, rebuilt or worn vehicles and machinery.

With **LSA OIL STABILIZER** your engine and machinery will run smoother, cooler, cleaner, producing more power whilst reducing fuel and oil consumption.

BENEFITS

- Blends with any oil or grease – mineral or synthetic.
- Improves oil cleanliness and reduces oil consumption in new and worn equipment.
- Extends equipment and oil life and improves oil pressure.
- Reduces noise, heat, slip, grab and leaks in transmissions.
- Reduces seal leakage.
- Reduces operating temperatures in engines, gearboxes and other equipment.
- Reduces engine friction which gives smoother/easier starting, including in cold weather.

Package Sizes **205 litre**
