

## **LSA COTTON SPINDLE CLEANER** *(for Cotton Harvesters)*

**LSA Cotton Spindle Cleaner** is a water-soluble oil to produce an emulsion. The emulsion cleans the spindle and leaves the spindle lubricated and inhibits corrosion.

### **DIRECTIONS**

1. Clean the system and half fill the tank with water.
2. Agitate the water back to the tank.
3. While the water is agitating, add the spindle cleaner to the water at the ratio of one litre of LSA Cotton Spindle Cleaner to 100-200 litres of water.
4. Fill the tank with water and agitate for 15 minutes before use to ensure complete mixing.

### **FEATURES**

- Protects metal parts against corrosion
- Eliminates sap build up on spindles
- Emulsifies in hard water
- Leaves the spindle lightly lubricated

### **TYPICAL CHARACTERISTICS**

Properties	Unit	Value
ISO Grade		22
Viscosity @ 40°C	cSt	20
Density @ 15°C	g/ml	0.90
Flash Point COC	°C	160
Pour Point	°C	-35

### **Package sizes**

**1000 litre  
205 litre  
20 litre**
