

Brake Fluid DOT 4

Brake Fluid DOT 4 is a heavy-duty brake fluid engineered to cater to both light and heavy vehicles. It is a polyglycol ester enriched with corrosion inhibitors and fluid modifiers, ensuring compatibility with all metals and rubber seals commonly found in automotive braking systems.

Notably, it can sustain heavy-duty vapor lock temperatures throughout its service life, making it suitable for initial fills and after-care markets. This brake fluid is ideal for all disc and drum braking systems in average to high-performance vehicles with high thermal loads, as well as hydraulic clutch systems.

Meets the following specifications:

- MAN TUC 6518/07
- FMVSS No. 116 DOT 4
- ISO 4925 Class 4
- SAE J1704

Typical Characteristics:

Properties	Method	Unit	Value
SAE Grade			J1704
Viscosity @ -40°C	ASTM D445	cSt	<1,800
Viscosity @ 100°C	ASTM D445	cSt	>1.5
Viscosity Index	ASTM D1287	pH	7-11
Density @ 15°C	ASTM D4502	g/ml	1.04
Dry Boiling Point		°C	>230
Wet Boiling Point		°C	>155

Package Sizes:

- 1000L
- 200L
- 20L
- 5L
- 1L
