

Transfluid 450

Transfluid 450 is a transmission and drive train oils (TDTO) designed to optimize performance in a wide range of earthmoving, mining, agriculture, and automotive equipment applications incorporating hydraulic, hydrostatic transmission systems, final drives, and oil immersed brakes.

They have passed the strict requirements of Caterpillar TO-4 and Allison C4 specifications, including gear wear requirements.

Transfluid 450 is for use in final drives and differentials which specify the use of Caterpillar TO4, while is also for use in older Road Ranger manual gear boxes where an SAE 50 engine oil or SAE 90 gear oil is specified.

Meets the following specifications:

- API GEARS MT-1
- ALLISON C4
- CATAPILLAR TO-4
- EATON FULLER ROAD RANGER
- KOMATSU DRESSER
- TREMEC / TTC

Typical Characteristics:

Properties	Unit	Value
SAE Grade		50
Viscosity @ 40°C	cSt	197
Viscosity @ 100°C	cSt	18
Viscosity Index		100
Density @ 15°C	g/ml	0.89
Flash Point	°C	260
Pour Point	°C	-10

Package Sizes:

- 1000L
- 200L
- 20L
